Re: Completeness Determination and Preliminary Determination for SNAP Submission for N2 Towers N₂ Generator system as a Fire Suppressant

Dear Mr. Richardson:

Thank you for your submission to the Environmental Protection Agency's (EPA's) Significant New Alternatives Policy (SNAP) program. N2 Towers Inc.'s submission has been reviewed for completeness as part of the initial SNAP review. We intend to list N2 Towers as acceptable for use in the end use listed below, provided we receive no information to the contrary. Once published, the determination may only be changed through notice-and-comment rulemaking

Substitute name: N2 Towers (N₂ Generator Fire Suppression System)
Substance(s) the substitute will replace: Halon 1301
Sector: Fire Suppression and Explosion Protection
End-uses:

- Total Flooding Agents (occupied and unoccupied spaces)

Date received: 12/16/2009
Date most recent information received: 03/08/2010
Status of submission: Complete
Date 90-day review began: 03/08/2010
Preliminary decision: acceptable

Your submission was complete as of March 8, 2010 when the 90-day SNAP review began. You are allowed to sell the N2 Generator Fire Suppression System in the U.S. as of June 9, 2010. We intend to publish our final decision in an upcoming notice in the *Federal Register* later this year. If you have questions about your submission or the Agency's process for listing a final decision, please contact me at (202) 343-9337.

Sincerely,

A handwritten signature in black ink, appearing to read "M Shimamura".
